

AN INDEX
TO THE AGENDAS
OF THE
METHODIST CONFERENCE

Volume 3

2007-2019

It is hoped that this index will be useful for people who have access to the Agenda editions, as it is referenced by page number, following Brian Beck's method used in Volumes 1 and 2. This index will not be as useful for people who do not have access to the published editions. Volume 4 starting 2020 will include paragraph references as well as page numbers.

Please note that Methodist Church House is currently closed and so the Conference Office staff do not have access to the library.

See the link below for the Conference reports starting 2005.

<https://www.methodist.org.uk/about-us/the-methodist-conference/conference-reports/>

Index Volume 3 to the Agendas of the Methodist Conference 2007-2019

Please see Brian Beck's Introduction to Volume 1 of the Index

This index is an attempt to continue the work of Brian Beck's earlier two Volumes (Vol 1 1932-1996 and Vol 2 1997-2006). It is designed to enable users to locate information within the Conference Agendas. The work of indexing involves analysing the document, identifying indexable terms and concepts, and creating appropriate headings. The task of the indexer involves selecting appropriate terms for index entries, and deciding what is significant information in a text. Index entries are therefore given **where they lead to worthwhile information** but do not include passing mentions as these would only frustrate the user.

References are given by year (17, 18, 19 etc) followed by the agenda page number. References are listed by starting page. * indicates major report. This follows Brian Beck's method of referencing but this may not be the best for all users in the digital age. In future a "Year/Report Number/Paragraph number" may be given in addition to the page references.

One has tried to avoid too many multiple entries under different headings for the same item, in order to keep the document to a reasonable size (with some exceptions for major items). Users should therefore employ the 'find' function.
